RE: Wahconah Park
[DEP File #263-806]

Dear Mr. Mitchell;

Upon further consideration we have revised the plans for the above-named project to incorporate additional drainage control measures. Specifically, we have added a “bio-swale” along the downgradient side of the main parking lot. This will result in additional improvements over existing conditions.

Please refer to drawings #3 & #8 of 8 (revised January 26, 2009) for reference to this change.

No other changes have been made to the plans.

If you should have any questions or require additional information, please do not hesitate to contact our office.

Sincerely,

SK DESIGN GROUP, INC.

Robert G. Fournier
